- IoT (application-level development exposure)

Emerging Areas

- Python, .Net Core
- Generative AI, Machine Learning, LLMs, RAG, Vector databases

PROFESSIONAL EXPERIENCE

Johnson Controls

Application Delivery Lead | Oct 2023 – Present

Executed delivery using a **hybrid Agile–PMP approach**, balancing predictive planning, governance milestones, and Agile execution to meet enterprise delivery and compliance requirements.

Key Achievements & Responsibilities

- Own delivery for **multiple concurrent projects and programs**, ensuring on-time, high-quality releases aligned with business objectives.
- Lead **Agile and SAFe practices**, including PI Planning, Scrum ceremonies, release planning, and continuous improvement initiatives.
- Manage **resource planning, vendor coordination, and cross-team dependencies** across distributed teams.

- Establish delivery **governance, KPIs, and executive dashboards** to track progress, risks, and outcomes.
 - Drive **risk mitigation, release management, and quality assurance**, improving delivery predictability by 30% and stakeholder confidence.
 - Partner with architecture and engineering teams on **solution design, technical governance, security compliance, and performance optimization**.
 - Build and mentor high-performing teams through **coaching, performance reviews, and talent development**.
 - Enable continuous improvement through **automation, refactoring initiatives, and adoption of modern delivery practices**.
-

Axis Bank Ltd

Product Development Manager | Apr 2021 – Oct 2023

Led delivery and execution of **digital banking and enterprise technology initiatives** in a highly regulated BFSI environment.

Key Achievements & Responsibilities

- Managed **multi-team delivery programs** spanning product development, enhancements, and regulatory initiatives.
 - Collaborated with **business heads, compliance, and technology leaders** to align delivery with regulatory and business priorities.
 - Improved delivery transparency through **structured planning, milestone tracking, and leadership reporting**.
 - Oversaw **release management, UAT coordination, and production readiness**, ensuring minimal risk and high stability.
 - Strengthened Agile execution through **Scrum and SAFe-aligned practices**, improving team throughput and predictability.
 - Played a key role in **stakeholder communication, dependency management, and decision facilitation**.
-

Johnson Controls India Pvt. Ltd.

Technical Lead | Oct 2016 – Apr 2021

Transition role combining **technical leadership and delivery management**, supporting agile adoption at scale.

Key Contributions

- Led **Scrum teams** delivering enterprise applications and platforms.
 - Facilitated Scrum ceremonies, backlog management, sprint planning, and retrospectives.
 - Worked closely with product owners to **prioritize features and align delivery with business value**.
 - Mentored team members and supported early-stage **Agile transformation initiatives**.
-

- **Technical Lead (Self-Employed)** | Mar 2016 – Oct 2016
- **Application Engineer – Raw Engineering (Built.io)** | Apr 2015 – Mar 2016
- **Programmer – Netwin Infosolutions** | Mar 2014 – Apr 2015
- **Software Engineer – Darkhorse Infotech** | Sep 2011 – Feb 2014
